All documents and presentations will be uploaded on the according RTCA and EUROCAE repository (in the folder of September Plenary meeting).

Minutes

1) Welcome, Introductions, Administrative Remarks by Leadership

Radek Zaruba welcomed the group and participants briefly introduced themselves.

2) RTCA/EUROCAE Opening Material

Karan Hoffman and Mark Watson presented the RTCA and EUROCAE opening material.

3) APPROVAL OF THE AGENDA

Radek Zaruba introduced the proposed agenda of the RTCA SC-222/ EUROCAE WG-82 joint plenary meeting. The final agreed agenda looks as follows:

AGENDA

Joint SC-222 / WG-82 Plenary

1. Welcome, Introductions, Administrative Remarks by Leadership
2. RTCA/EUROCAE Opening Material
3. Review Agenda
4. Review Minutes from previous meeting and Actions
- 5. Terms of Reference Discussion**
6. Any Other Business
7. Review Actions from this meeting
8. Set Future Meetings
9. Adjourn

4) Review Minutes and Actions

The minutes of the last meeting have been reviewed and the action item list has been updated accordingly. The result is summarized at the end of the present minutes.

5) Terms of Reference Discussion

The group agreed to move the FRAC completion target date from March to June 2024. Karan confirmed it's OK to publish for FRAC earlier if we're ready. This would imply publication in September 2024 timeframe.

The group agreed to take out references to any C2 related work as there is no concrete proposal for work to be done on the AMS(R)S MOPS and MASPS upcoming update.

The group discussed the impact of the ongoing updates on the TSO-C159. The current TSO doesn't address services supported by the AES (ACARS, ATN/OSI...) so addition IPS might have no impact. But the "(Enhanced) Service Sets" defined in the MOPS were originally defined with the intention to be reflected in the TSO so this should be further considered for any future TSO updates.

Action (Radek): Add on the agenda of the future working sessions the consideration on if and how the future TSO updates could reflect the "(Enhanced) Service Sets" supported by the AES.

The group discussed alignment between the EUROCAE and RTCA ToR.

Action (Radek, Mark): Propose WG-82 ToR updates to cover the DO-343F and DO-262H versions planned for March 2026 per SC-222 ToR so that the EUROAE and RTCA work stays aligned.

The group voted and unanimously approved the proposed ToR changes.

6) Any Other Business

This was last SC-222 / WG-82 meeting where Alan Schuster Bruce participated. The group thanked Alan for his contributions over the years.

7) Review actions from this meeting

8) Future Meetings and Next Steps

Radek and Mike to distribute the updated MOPS and MASPS in first week of January.

Iridium subgroup meeting in mid-January to introduce the changes to be organized by Mike.

Full group virtual meeting in January timeframe to review the proposed changes.

Action (Radek): Issue a Doodle poll to find a slot for the review working session in the week starting 29th of January (2024).
